Out of Office Jan 21 2022 "This book will challenge you to rethink

what it takes to make remote work work—not just for companies, but for people.” —Adam Grant, #1 New York Times bestselling author of Think Again and host of the TED podcast WorkLife The future isn’t about where we will work, but how. For years we have struggled to balance work and life, with most of us feeling overwhelmed and burned out because our relationship to work is broken. This “isn't just a book about remote work. It's a book that helps us imagine a future where our lives—at the office and home—are happier, more productive, and genuinely meaningful” (Charles Duhigg, best-selling author of The Power of Habit). Out of Office is a book for every office worker – from employees to managers – currently facing the decision about whether, and how, to return to the office. The past two years have shown us that there may be a new path forward, one that doesn’t involve hellish daily commutes and the demands of jam-packed work schedules that no longer make sense. But how can we realize that future in a way that benefits workers and companies alike? Based on groundbreaking reporting and interviews with workers and managers around the world, Out of Office illuminates the key values and questions that should be driving this conversation: trust, fairness, flexibility, inclusive workplaces, equity, and work-life balance. Above all, they argue that companies need to listen to their employees – and that this will promote, rather than impede, productivity and profitability. As a society, we have talked for decades about flexible work arrangements; this book makes clear that we are at an inflection point where this is actually possible for many employees and their companies. Out of Office is about so much more than zoom meetings and hybrid schedules: it aims to reshape our entire relationship to the office.

highest tiers of professional accomplishment, are substantially less likely than men to demonstrate ambition to seek elected office. Women are less likely than men to be recruited to run for office. They are less likely than men to think they are 'qualified' to run for office. And they are less likely than men to express a willingness to run for office in the future. This gender gap in political ambition persists across generations. Despite cultural evolution and society's changing attitudes toward women in politics, running for public office remains a much less attractive and feasible endeavor for women than men.
